Datadog

WORK EXPERIENCE

Software Engineer at Schibsted Tech Polska

Sep 2019 – Present

- As part of the Premium Shared Team we are responsible for delivering a platform that powers up the frontpages and articles of some of the biggest Scandinavian newspapers. We are responsible for creating tools and platforms that are easy for brand developers to create performant code.
- In our project we use TypeScript, React, Webpack, Node, Jest and Varnish cache. I also have the opportunity to build services using Amazon Web Services.

Cloud Infrastructure Analyst at Capgemini Polska

Nov 2017 – Aug 2019

- As part of the Office 365 FastTrack Team I am responsible for the preparation and migration of clients' data to the Microsoft cloud. From the onboarding process to the actual data migration and postmigration reporting.

IT Operations Analyst at Stanley Black & Decker

Nov 2016 – Oct 2017

- Part of the ITSM Change Management team and responsible for the later deployment and implementation of the technologies VMWARE AirWatch support for Android and Apple devices, Avecto Access Management and Zscaler Cloud Security. – Responsible for administering PowerShell scripting for AD User Management and Exchange Online.

IT Specialist at HCL Poland

Oct 2013 – Oct 2016

- Responsible for resolving end-user network, hardware and software problems, MS Office, Internet, dial-in, TCP/IP and local-area network access problems via telephone / email including remote access. Software deployment. Installing applications and drivers, coordinating all hardware and software upgrades and performing backups.

EDUCATION

English Literature at UNED University, Spain

2015 - undefined

I was supposed to have finished my Degree in English Literature by 2020 though I decided to postpone it as I wanted to focus on my career as a Software Engineer.

LANGUAGES

- **Spanish** and **English** advanced level.
- **Polish** basic-intermediate level.
